Any unforgettable day on a Sea-Doo® can go from exciting to relaxing and back again. And with the 2017 lineup, that tradition of fun continues. From pulse-pounding performance and top-of-the-line luxury models to playful units and everything in between.

And Sea-Doo is reinventing the way to play on the water with the new SPARK™ TRIXX™. Now, whip, dip, spin and dunk with ease, thanks to one-of-a-kind features made just for nailing the best tricks imaginable. It’s everything you need to maximize your fun on the water.
DISCOVER THE SEA-DOO DIFFERENCE.

And more customers recommend Sea-Doo than any other brand.1

INDUSTRY-FIRST INNOVATION
Pushing boundaries with the exclusive on-water brake, suspension, Closed-Loop Cooling system and more.

MOST AFFORDABLE
Lowest entry-level price in the industry; nearly 20% less than the competition! No other watercraft even comes close.

UNMATCHED FUEL EFFICIENCY
Some Sea-Doo models boast 35% better fuel efficiency than the closest competitor!2

EXCLUSIVE SUSPENSION
No other watercraft on the market delivers on-water suspension for the most comfortable ride.

0-60 MPH (96.6 KM/H) IN 3.8 SECONDS
Leading the industry in the most exhilarating and heart-pounding ride.

U.S. COAST GUARD RECOGNIZED
Sea-Doo has numerous design awards to go along with the acknowledgment by the U.S. Coast Guard for improving boating safety since 2009.

1 Based on industry data and BRP estimates and research.
2 Source: Manufacturers’ website. Prices may vary according to product specification.
3 Based on BRP internal testing and information on manufacturer’s website.
4 Performance number achieved under optimal testing conditions with the RXT-X 300.
5 Race-inspired ergonomics led the RXP-X® to 5 world titles. The exclusive Ergolock™ system with a narrow racing seat with deep knee pockets, angled footwell wedges and adjustable ergonomic steering, allows riders to lock in for even more control.

This pulse-pounding 300-hp engine boasts the industry's best power-to-weight ratio. Supercharged with an external intercooler, the Advanced Combustion Efficiency (ACE) technology delivers high efficiency and amazing acceleration. Case in point, the adrenaline-pumping RXT-X goes from 0-60 mph (96.6 km/h) in just 3.8 seconds.

Supercharged with an external intercooler, the advanced technology of the Rotax 1503 HO provides proven and reliable performance. Equipped with Advanced Combustion Efficiency (ACE) technology, this new engine is faster and more powerful than its predecessor, but just as fuel efficient and is optimized for regular fuel.

The most-powerful, naturally aspirated Rotax engine on a Sea-Doo offers instant acceleration for instant fun. Tested and proven to be incredibly reliable and fuel-efficient for more than a decade. This engine continues to be the benchmark of reliability, fun performance and fuel economy, thanks to technologies and innovations developed by Rotax engineers in the last decades.

The most fuel-efficient, compact and lightweight engine on the market today. The Rotax 900 ACE features great power-to-weight ratio with a top speed of more than 40 mph (64.4 km/h).

Incorporates immediate acceleration, impressive fuel economy and an excellent power-to-weight ratio with a top speed of 50 mph (80.5 km/h) with its compact and lightweight design.

Light on weight, heavy on fun. The flatter V-shaped hull makes riding fun and easy in flatter water and small chop. And makes whipping through rougher conditions even more thrilling.

With unmatched high performance, superior fuel efficiency and proven reliability, Rotax engines continue to set the standard in the industry. Every model features the industry-exclusive closed-loop cooling system to keep corrosive saltwater and debris out of your engine. For peace of mind in any water. New for 2017 is the Rotax 1500 HO ACE and all supercharged engines are now maintenance free.

A variety of innovative hull designs for a variety of riding styles.

GTI Hull: Forgiving & Nimble
This moderate V-shaped hull is both forgiving and responsive for a sensible ride in smooth and moderate water conditions.

T3 Hull™: Performance & Precision
Ready, set, race. A deep V-shaped hull – the favorite of our Sea-Doo X-Team racers – allows unmatched control and precision for the sharpest turns and unrivaled handling. (RXP-X 300 only)

Spark Hull: Light & Easy to Handle
Light on weight, heavy on fun. The flatter V-shaped hull makes riding fun and easy in flatter water and small chop. And makes whipping through rougher conditions even more thrilling.

New for 2017 is the Rotax 1500 HO ACE and all supercharged engines are now maintenance free.
The narrow, race-inspired seat and deep knee pockets let you lock in and use your legs for better control. Reducing upper body fatigue and making you feel like one with the machine.

**UNMATCHED CONTROL, HANDLING AND COMFORT.**

**The industry’s first and most intuitive on-water brake.**

The Sea-Doo exclusive iBR (Intelligent Brake and Reverse) has been recognized by the U.S. Coast Guard for improving boat safety since 2009. Activating the second-generation brake system allows you to stop up to 160 feet (48.75 m) sooner than watercraft not utilizing a brake. The revolutionary design also lets you keep both hands on the handlebar while in neutral, forward or in reverse, for greater control and easier maneuvering around docks and other boats. And it’s as simple and instinctive as squeezing the handbrake on a bicycle.

**ON-WATER SUSPENSION, ONLY ON SEA-DOO.**

The exclusive suspension system delivers comfort and control for a smoother, longer ride in any condition. The pioneering design allows the hull to move independent of the upper deck with 5.5 inches (14 cm) of travel, isolating the rider and passengers from the impact of choppy water.

**iTC™ INTELLIGENT THROTTLE CONTROL ADJUSTS TO DIFFERENT DRIVING MODES.**

Another Sea-Doo exclusive, the Closed-Loop Cooling system uses coolant to keep the engine running at ideal temperatures. Unlike competitors, this technology prevents corrosive saltwater and damaging debris from entering the engine, for increased reliability, longevity and peace of mind.

**POLYTEC™ LIGHTWEIGHT, HIGH-STRENGTH MATERIAL.**

This innovative material reduces the weight of the watercraft to deliver peak performance even with smaller engines and makes it easy to tow with small cars. Plus, the color-in-molding is more scratch-resistant than fiberglass.

**CLOSED-LOOP COOLING SYSTEM**

This exclusive Sea-Doo feature produces up to 46% improved fuel efficiency by automatically determining the most economical power delivery. No matter what your riding style is, you can easily set different throttle responses to match your activity.

**ECO® MODE**

Set it and forget it. This activity-specific mode lets you set your speed for cruising, tow sports, navigating no-wake zones and more.

**TOURING & SPORT MODES**

Tow the perfect line, every time. The five different acceleration profiles make it easy for the driver to deliver a smooth launch and maintain a consistent pace. So, boarders can focus on shredding like pros.

**CRUISE MODE**

Set it and forget it. This activity-specific mode lets you set your speed for cruising, tow sports, navigating no-wake zones and more.

**Ski Mode**

The Sea-Doo exclusive iBR (Intelligent Brake and Reverse) has been recognized by the U.S. Coast Guard for improving boat safety since 2009. Activating the second-generation brake system allows you to stop up to 160 feet (48.75 m) sooner than watercraft not utilizing a brake. The revolutionary design also lets you keep both hands on the handlebar while in neutral, forward or in reverse, for greater control and easier maneuvering around docks and other boats. PERFORMANCE
FAST & FEARLESS
SEA-DOO PFDs
No matter your riding style, Sea-Doo has you covered. Choose from 3 categories of PFDs to suit your needs. From light and versatile Nylon to comfortable Neoprene, or the best-of-both-worlds Ecoprene.

ELEMENT RIDING SUIT
Whatever the weather, stay stylish, warm and functional, both on and off the water.

TOW SPORT ACCESSORIES
Make your wake sessions even more epic with the retractable high-rise pylon that raises the tow point. The 3-piece wakeboard rack makes for easy storage. The Tow Pro package comes with 3 essential tow accessories: folding pylon, spotter handles and equipment rack.

EASY REBOARDING
Take a dip or carve some wake and then get back on board. The fold-down step design and knee-friendly surface make it easy to reboard the SPARK, even in deep water. Reboarding ladder also available on other models.

GEAR & ACCESSORIES
Gear up for great days.
Live the Sea-Doo lifestyle on and off the water. Sea-Doo’s innovative riding gear and accessories are the perfect way to make good days even better. From a wide selection of clothing and PFDs to trailers and accessories made to customize your watercraft, Sea-Doo has everything to make your life even simpler. Get all the details on Sea-Doo riding gear, parts and accessories at your local dealer or online at store.sea-doo.com.
**MOVE™ TRAILERS**

Move trailers fit the hull of your Sea-Doo watercraft perfectly making loading and unloading really simple and they come in different models to suit every type of watercraft.

**SNAP-IN FENDERS**

Protect your investment and keep your ride looking new. Designed exclusively for Sea-Doo watercraft, they easily snap on when docking and store out of the way when playing.

**XPS ENGINE OILS AND MAINTENANCE PRODUCT**

The XPS brand has a complete family of performance products to expertly protect, enhance and extend life of your BRP vehicle.

**SEA-DOO SPEED TIE**

Fully integrated watercraft mooring system providing the ultimate in convenient, quick and secure docking.
